

VIVEK PODDAR

UI/UX & Product Designer

Kolkata, India | +91-8597449308 | vivekpoddar.work@gmail.com | linkedin.com/in/vivekpoddar-work
Portfolio: poddarvivek.github.io | Case studies: poddarvivek.github.io/case-studies | github.com/PoddarVivek

SUMMARY

Product and UI/UX designer with an engineering degree from NIT Kurukshetra and three live products across fintech, edtech and healthtech. Works end to end: researching the user and the domain, mapping flows, designing the interface and shipping it, with two published case studies documenting the problem, the users and each design decision. A data-analysis background (Python, SQL, Power BI) brings evidence to design choices and clear measures of success.

EXPERIENCE

Freelance Product Designer & Developer

Aug 2026 – Present

Independent client work in financial services and education | [Read the case studies](#)

- [NBFC lending website](#) — replaced a dead site that generated no leads. Named each loan by the borrower's moment of need rather than jargon, put RBI trust signals and "no hidden costs" commitments before the pitch, added an EMI calculator so visitors can do the maths themselves, and made contacting the team one tap from any section.
- [Home tutor website](#) — took a tutor with no online presence online. Designed separate paths for parents (trust, FAQs) and students (60-second quiz, 30-second lessons), and swapped an ignored enquiry form for a pre-written WhatsApp message built from class, board and subject taps.
- Owned both end to end, from research and user flows to mobile-first UI and deployment; enquiries are captured in Supabase for client follow-up.

Founder's Office — Business Relations & Research, Butter Search

Jul 2026 – Present

Executive search firm for VC-backed startups

- Map VC-backed startups by funding stage, sector and likely leadership gaps, and rank them by fit to decide where outreach goes first.
- Run discovery conversations with founders and turn their needs into structured briefs, the same research-to-requirements skill used in product design.
- Track the outreach pipeline in Excel and analyse response and conversion trends to refine targeting and messaging.

Product Analytics & Development Intern, Growup

Jun 2024 – Jul 2024

Remote

- Worked with product managers, developers and designers to improve product workflows; built prototypes focused on customer engagement and conversion.
- Worked across 20+ REST APIs for data collection and workflow automation; improved operational data reliability by 30%, enabling accurate KPI monitoring.

PROJECTS

ClinicAI — AI Front Desk for Independent Clinics | [Live](#)

Healthtech · Personal project

- Designed and built a SaaS product end to end, including a dashboard where the doctor stays in control: anything outside the clinic's rules becomes a request to approve or decline, rather than an AI decision.
- Designed a 5-step onboarding wizard that ends with a test call booking a real slot, and a patient portal to reschedule or cancel without calling; defined a North Star metric of AI-booked appointments per clinic per week.

HyperScan KYC Flow & Park+ Teardown | [Case study](#)

UX · PRDs

- Designed an identity-verification flow with real-time ID feedback, auto-crop and selfie verification, documented in a PRD and case study. Also wrote a Park+ onboarding teardown and PRD fixing a friction point found through first-hand use.

Data & Insight Projects

Python · SQL · Power BI

- Churn drivers and at-risk segments from 15,000+ customer records; [T20 World Cup analytics](#); [Netflix catalogue](#) and [hospital equity](#) analyses in SQL.

SKILLS

Design: Figma, wireframing, prototyping, user flows, information architecture, design systems, mobile-first and responsive UI, content design

Research & product: user and market research, competitive analysis, product teardowns, PRD writing, success metrics

Build & data: HTML, CSS, JavaScript, Next.js, Supabase, Git, Vercel · Python, SQL, Excel, Power BI, Tableau

EDUCATION

B.Tech, Electronics & Communication Engineering — NIT Kurukshetra

2022 – 2026

LEADERSHIP & CERTIFICATIONS

- **Logistics Lead, Confluence** (NIT Kurukshetra annual fest): coordinated 10–15 vendors and ran stage, artist and audience-flow logistics for marquee acts.
- **Committee Head**, MUN and Confluence 2025 · **Publicity Head**, ELAD debating club · District-level cricketer (CAB) · **Certified:** GenAI Data Analytics (Tata × Forage), SQL Bootcamp (Udemy)
