Portfolio: poddarvivek.github.io

SUMMARY

Engineering graduate (NIT Kurukshetra) moving into product and UX design, with hands-on experience designing and shipping responsive websites for real clients and turning ambiguous business needs into clear, usable interfaces. Brings a product-thinking and data-analysis foundation: writing PRDs, spotting UX friction in live products, and using research to back design decisions. Looking for a product/UX design internship to build user-centred products end to end.

EXPERIENCE

Founder's Office — Research & Outreach, Butter Search

Sept 2026 – Present

- Run structured research on high-growth startups and their leaders to identify, prioritise, and personalise outreach.
- Hold discovery conversations with founders and candidates, translating their needs into structured briefs and requirement documents.
- Built Excel-based tracking systems to manage the outreach pipeline and analyse response and conversion trends.

Freelance Web Designer & Developer

2025 – Present

Independent client projects — financial services and education | [Case studies](#)

- Designed, built, and deployed responsive business websites end to end, from layout and user flows to frontend and backend.
- Integrated Supabase as the backend to capture and structure customer data, replacing manual record-keeping for clients.

Product Analytics & Development Intern, Grrrowup

Jun 2024 – Jul 2024

Remote

- Built product prototypes focused on improving customer engagement and conversion.
- Improved operational data reliability by 30%, enabling accurate KPI monitoring and reporting.

PROJECTS

Park+ Onboarding — Product Teardown & PRD

Product / UX

- Identified a real onboarding UX friction point from first-hand use, then produced a teardown page and a full PRD proposing a fix.

Freelance Website Case Studies | [View case studies](#)

UX / Web Design

- [NBFC lending website](#) — revived a dead site: loans framed by the borrower's moment of need, trust signals up front, EMI calculator, one-tap contact.
- [Home tutor website](#) — took a tutor online with a pre-filled WhatsApp enquiry flow, a student quiz, and 30-second lessons.

Clinic AI — Clinic Booking & Automation Platform | [GitHub](#)

Team Project

- Co-built an AI platform that streamlines appointment booking and clinic workflows for Indian doctors and clinics.

Data & Insight Projects

Python / SQL

- [T20 World Cup Analytics](#) — Python analysis of team and player performance, scoring patterns, and outcomes.
- [Netflix Content Analysis](#) — SQL analysis of catalogue trends, genres, ratings, and release patterns.
- [Lown Hospital Index for Equity](#) — SQL analysis of hospital performance and patient-outcome disparities.

SKILLS

Design: Figma, wireframing, user flows, responsive web design

Product: PRD writing, product teardowns, user & market research, competitive analysis

Build: HTML, CSS, Supabase, Git, Streamlit

Data: Python, SQL, Excel, Tableau, Power BI

Certifications: Tata GenAI Data Analytics Job Simulation (Forage, 2026); Maven Silicon Embedded Systems

EDUCATION

B.Tech, Electronics & Communication Engineering — NIT Kurukshetra

2022 – 2026

POSITIONS OF RESPONSIBILITY

Logistics Lead, Confluence — NIT Kurukshetra's Annual Fest

- Coordinated 10–15 vendors across the fest and ran on-stage, artist, and audience-flow logistics for marquee acts including Groove Armada.

Committee Head, ELAD — English Literary & Debating Club

- Led the core team, planning and running debates and literary events for the college's literary society.

Cricketer — NIT Kurukshetra College Team & CAB District Level

- Represented the college at intercollegiate level and played district-level cricket under CAB.
