SUMMARY

Engineer from **NIT Kurukshetra** (B.Tech ECE, 2026), an Institute of National Importance, now in the **Founder's Office at Butter Search**, where I own client acquisition. I work out what's worth building, then design and ship it: **four live products** across fintech, healthtech, edtech and food delivery, each framed by a problem, a decision and a success metric. Comfortable with founders, data and Figma alike. AI-first: fluent in Claude, ChatGPT and n8n.

EXPERIENCE

Founder's Office, Butter Search — Jul 2026 – Present
Boutique executive search firm founded by IIM Calcutta alumni, hiring leaders for VC-backed startups | buttersearch.co

- Own the client-acquisition funnel end to end; defined five stages from hiring signal to signed mandate, each with an entry rule and a conversion metric.
- Prioritise target startups on dated hiring signals such as funding rounds and leadership hires, segmented by stage, sector and leadership gaps.
- Run discovery calls with founders and turn their needs into structured hiring briefs for the search team.
- Built the founder's funnel dashboard and daily report (stage counts, conversion, hot leads, due follow-ups); introduced a trigger-led first message and a two-day follow-up cadence.

Freelance Product Designer — Aug 2026 – Present
Client projects in fintech and edtech | Case studies

- **Maitry Finance** (RBI-registered NBFC): a dead website brought in no leads. Rebuilt the information architecture around borrowers' worries, put RBI trust signals first, and shipped an EMI calculator and one-tap contact, with enquiries captured in Supabase.
- **Rinkal Coaching**: parents ignored the enquiry form and preferred WhatsApp. Shipped a tap-to-compose WhatsApp enquiry that takes about 20 seconds, with separate journeys for parents and students.
- Led both from discovery to launch: user research, scope, wireframes, design system, Next.js build and deployment.

Product Analytics & Development Intern, Grrowup — Jun 2024 – Jul 2024
Remote

- Worked with product managers, developers and designers; prototyped features to improve engagement and conversion.
- Integrated 20+ REST APIs and improved operational data reliability by 30%, enabling accurate KPI tracking.

PRODUCTS

ClinicAI, AI front desk for independent clinics | Live | Case study — Own product

- Small clinics lose patients to unanswered calls. Shipped an AI receptionist (English, Hindi, Bengali) that books inside the clinic's rules and routes every exception to the doctor for approval.
- Set the North Star (AI-booked appointments per clinic per week) and activation (a test call books a real slot within 10 minutes of sign-up); designed the onboarding, approval dashboard and patient portal.

Spotted, a social tab concept for Swiggy | Prototype | Case study — Concept

- Ordering in is social but happens alone, and generic pushes get ignored. Designed live friend orders, stickers and one-tap “order the same”, with a research-backed impact model and a 4-week experiment measured on orders per user per week.

Product and data projects — SQL | Python | Power BI

- Park+ onboarding teardown with a metric tree, funnel model and sample-size calculator; HyperScan digital KYC flow with a PRD.
- Analysed 15,000+ customer records for churn drivers; retail sales pipeline (September to December brings 57% of revenue); SMS spam classifier (held-out F1 0.945 to 0.969); T20 World Cup and hospital equity analyses.

SKILLS

Product: discovery, problem framing, PRDs, success metrics and North Star, funnel design, experiment design, product teardowns, stakeholder management
Design: Figma, wireframing, prototyping, user flows, information architecture, design systems, mobile-first UI
Business & data: market research, founder discovery, pipeline and funnel reporting, SQL, Python, Excel, Power BI, Tableau
Build & AI: HTML, CSS, JavaScript, Next.js, Supabase, Git; AI-first with Claude, ChatGPT and n8n
Certifications: GenAI Powered Data Analytics (Tata × Forage, 2026); The Complete SQL Bootcamp (Udemy, 2025)

EDUCATION

B.Tech, Electronics & Communication Engineering, NIT Kurukshetra — 2022 – 2026
Institute of National Importance; admitted through JEE Main

LEADERSHIP

- **Logistics Lead, Confluence** (NIT Kurukshetra annual fest): ran logistics for marquee acts across 10 to 15 vendors, stage operations, artists and audience flow.
- **Committee Head**, Model United Nations and Confluence 2025; **Publicity Head**, ELAD literary and debating club; district-level cricketer (CAB).
